

معرفی نشریات برتر مدیریت پروژه در سطح بین المللی

1- International Journal of Project Management

The International Journal of Project Management offers wide ranging and comprehensive coverage of all facets of project management. Published eight times per year, it provides a focus for worldwide expertise in the required techniques, practices and areas of research; presents a forum for its readers to share common experiences across the full range of industries and technologies in which project management is used; covers all areas of project management from systems to human aspects; links theory with practice by publishing case studies and covering the latest important issues.

Application areas include: information systems, strategic planning, research and development, system design and implementation, engineering and construction projects, finance, leisure projects, communications, defence, agricultural projects, major re-structuring and new product development. Papers originate from all over the world and are fully peer-reviewed, on the 'double-blind' system. In addition, the journal...

2-Project Management Journal

Project Management Journal (PMJ) Mission Statement:

The Project Management Journal's mission is to shape world thinking on the need for and impact of managing projects by publishing cutting-edge research to advance theory and evidence-based practice.

Projects represent a growing proportion of human activity in large, small, private or public organizations. Projects are used to execute and sustain today's organizational activities. They play a fundamental role as the engine of tomorrow's innovation, value creation, and strategic change. However, projects too often fail to deliver their promise.

PMJ addresses these multiple challenges and opportunities by encouraging the development and application of novel theories, concepts, frameworks, research methods, and designs. PMJ embraces contributions both from within and beyond project management to augment and transform theory and practice.

The Journal welcomes articles on projects, programs, project portfolios; megaprojects; project-based organizations, project networks, project business, and the projectification of society. It welcomes the following topics, but not limited to: governance; strategy; innovation and entrepreneurship; organizational change, learning, capabilities, routines, information systems and technology; complexity and uncertainty; ethics; leadership; teams; and stakeholder management in a wide range of contexts.

5-Project Manager Magazine

Project Manager is the official membership magazine of AIPM. Published six times a year, Project Manager covers Australia's thriving project management industry and professionals. It presents case studies from around the country, as well as the world's best practice in project management. It also aims to stimulate debate among PM practitioners. **Website:** <https://www.aipm.com.au/resources/project-manager-magazine>

6-International Journal of Project Organisation and Management

Traditionally, project management has been neglected by business schools and by default it has become the preserve of more specialised professional faculties such as engineering and architecture. By taking a broader organisational perspective and by covering a wider range of industries and professions, *IJPOM* will appeal to a wider readership which includes not only those with an interest in mainstream management topics but also practitioners engaged in an unlimited variety of projects.

7-International Journal of Information Technology Project Management

This fully refereed journal examines current, state-of-the art research in the areas of information technology project management, and the interactions, linkages, applications, and support of project management using information systems. The journal encompasses theoretical, analytical, or empirical research, comprehensive reviews of relevant research, technical reports, book reviews, and also case studies of effective applications in this area. The use of new frameworks, principles, technologies, methods, and techniques are emphasized.
